ROUNDHILL MEME ETF - FUND SUMMARY

Investment Objective

The Roundhill MEME ETF (the “Fund”) seeks to track the performance, before fees and expenses, of the Solactive Roundhill Meme Stock Index (the “Index”).

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund (“Shares”). **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

Shareholder Fees (<i>fees paid directly from your investment</i>)	None
Annual Fund Operating Expenses (<i>expenses that you pay each year as a percentage of the value of your investment</i>)	
Management Fee	0.69%
Distribution and/or Service (12b-1) Fees	0.00%
Other Expenses*	0.00%
Total Annual Fund Operating Expenses	0.69%

* Estimated for the current fiscal year.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. The Example does not take into account brokerage commissions that you may pay on your purchases and sales of Shares. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year: \$70

3 Years: \$221

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in the Total Annual Fund Operating Expenses or in the Example, affect the Fund’s performance. Because the Fund is newly organized, portfolio turnover information is not yet available.

Principal Investment Strategies

The Fund uses a “passive management” (or indexing) approach to seek to track the performance, before fees and expenses, of the Solactive Roundhill Meme Stock Index which, in turn, seeks to track the performance of “meme stocks.” Meme stocks are equity securities, including common stock and American depositary receipts (“ADRs”), of companies that exhibit a combination of elevated social media activity (*i.e.*, the number of times a company or its ticker is mentioned on specific social media platforms) and high short interest (*i.e.*, the percentage of an issuer’s available publicly traded shares which are unrestricted (“free float shares”), that have been sold short but which have not yet been covered or closed out), both of which are indicators of market sentiment. Solactive AG acts as the index provider and calculation agent (the “Index Provider”).

Solactive Roundhill Meme Stock Index

The Index Provider will define the initial investable universe on the last business day of each month, which will become effective on the close of business five Business Days (defined below) later. The initial investable universe will include all U.S. exchange-listed equity securities (including ADRs) that meet minimum initial market capitalization, average and median daily traded value, and stock price criteria. Each issuer in this initial universe with a minimum market capitalization of \$1 billion on Selection Day (defined below) will be assigned a “social media activity score.” The social media activity score is based on the number of text-based (as opposed to graphics or other image-based) mentions of a company’s name or its ticker over a trailing 14-day period on specific social media platforms defined in the Index methodology, the primary purpose of which is to facilitate discussion of the performance of the financial industry generally and/or the stock or options markets specifically. The social media activity score is provided by a third-party data provider that also maintains an exclusion list intended to identify computer generated, false positive, and/or otherwise deceptive postings. Companies on the exclusion list will be excluded from the Index on Selection Day.

Upon each Selection Day, the top 50 issuers by social media activity score are then ranked according to their short interest, which is assigned by an independent third-party data provider. The resulting top 25 issuers by short interest will be selected as the components of, and equally weighted in, the Index.

The Index components will be rebalanced bi-weekly, with selections made on every second Friday (“Selection Day”). If a Selection Day does not fall on a day on which the New York Stock Exchange is open (a “Business Day”), then that Selection Day will be moved to the next Business Day. Any resulting adjustments to reconstitute the Index will be made on the second Business Day after the Selection Day.

The Fund’s Investment Strategy

Under normal circumstances, at least 80% of the Fund’s net assets (plus borrowings for investment purposes) will be invested in meme stocks, which may include common stock and depository receipts. From time to time, the Fund’s investments may include the common stock of U.S.-listed special purpose acquisition companies (“SPACs”), which are “blank check” companies with no commercial operations that are designed to raise capital via an initial public offering for the purpose of engaging in a merger, acquisition, reorganization, or similar business combination with one or more operating companies. The Fund expects that, over time, the correlation between the Fund’s performance and that of the Index, before fees and expenses, will be 95% or better.

The Fund will generally use a “replication” strategy to achieve its investment objective, meaning it generally will invest in all of the component securities of the Index in approximately the same proportions as in the Index. However, the Fund may use a “representative sampling” strategy, meaning it may invest in a sample of the securities in the Index whose risk, return and other characteristics closely resemble the risk, return and other characteristics of the Index as a whole, when Exchange Traded Concepts, LLC (the “Sub-Adviser”), the Fund’s sub-adviser, believes it is in the best interests of the Fund (*e.g.*, when replicating the Index involves practical difficulties or substantial costs, an Index constituent becomes temporarily illiquid, unavailable, or less liquid, or as a result of legal restrictions or limitations that apply to the Fund but not to the Index).

The Fund also may invest in securities or other investments not included in the Index, but which the Sub-Adviser believes will help the Fund track the Index. For example, the Fund may invest in securities that are not components of the Index to reflect various corporate actions and other changes to the Index (such as reconstitutions, additions, and deletions).

To the extent the Index concentrates (*i.e.*, holds more than 25% of its total assets) in the securities of a particular industry or group of related industries, the Fund will concentrate its investments to approximately the same extent as the Index. Because the Index is rebalanced bi-weekly, Index concentration may change frequently. The Fund may also experience high portfolio turnover.

The Fund is classified as a “non-diversified” investment company under the Investment Company Act of 1940, as amended (the “1940 Act”).

Principal Investment Risks

The principal risks of investing in the Fund are summarized below. The principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with those of other funds. Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which it appears. As with any investment, there is a risk that you could lose all or a portion of your investment in the Fund. Some or all of these risks may adversely affect the Fund’s net asset value (“NAV”), trading price, yield, total return and/or ability to meet its objective. The following risks could affect the value of your investment in the Fund:

- **Associated Risks of Meme Stocks.** Meme stocks are stocks whose trading volume increases not necessarily because of a company’s performance or fundamentals, but because of social media attention. Social media attention may result from a variety of factors, including the reputation of the issuer, marketing efforts, and the timing of the release of publicly available information, which may be unrelated to the company’s performance, financial position, or other business fundamentals. As a result, meme stocks are prone to high volatility, experiencing spikes of rapid growth in short spaces of time, followed by dramatic drops in price and value, which may be a result of panic selling or loss of general interest or popularity. Because meme stocks are heavily dependent on investor sentiment and opinion, they may be overpriced in comparison to the company’s fundamentals, resulting in losses to the Fund.
- **Associated Risks of Social Media Analytics.** The Fund’s investment strategy relies heavily on social media analytics, which are relatively new and untested. “Social media” is an umbrella term that encompasses various activities that integrate technology, social interaction and content creation. Investing in companies based on social media analytics involves the potential risk of market manipulation because social media posts may be made with an intent to inflate, or otherwise manipulate, the public perception of a company stock or other investment. Although the Index Provider attempts to mitigate the potential risk of such manipulation by employing screens to identify posts which may be computer generated or deceptive and by employing market capitalization and trading volume criteria to remove companies which may be more likely targets for such manipulation, there is no guarantee that such screens will be able to successfully reduce such risk. Furthermore, text and sentiment analysis of social media postings may prove inaccurate in predicting a company’s stock performance (*i.e.*, high positive sentiment may not correlate with positive change in the value of a company’s stock and low positive or negative sentiment may not correlate with negative

change in the value of a company's stock). Additionally, social media companies are susceptible to other events and concerns which may disrupt the ability to extract meaningful data from such sites, including permanent cessation of operations, disruption in service caused by hardware or software failure, interruptions or delays in service by third-party data center hosting facilities and maintenance providers, security breaches involving certain private, sensitive, proprietary and confidential information managed and transmitted by social media companies, privacy concerns and laws, and evolving Internet regulation and other foreign or domestic regulations that may limit or otherwise affect the operations of social media companies.

- **Concentration Risk.** Because the Fund's assets will be concentrated in an industry or group of industries to the extent the Index concentrates in a particular industry or group of industries, the Fund is subject to loss due to adverse occurrences that may affect that industry or group of industries.
- **Cybersecurity Risk.** Cybersecurity incidents may allow an unauthorized party to gain access to Fund assets, customer data (including private shareholder information), or proprietary information, or cause the Fund, the Adviser (defined below), the Sub-Adviser and/or other service providers (including custodians, transfer agents and financial intermediaries) to suffer data breaches or data corruption. Additionally, cybersecurity failures or breaches of the electronic systems of the Fund, the Adviser, the Sub-Adviser or the Fund's other service providers, market makers, Authorized Participants or the issuers of securities in which the Fund invests have the ability to cause disruptions and negatively impact the Fund's business operations, potentially resulting in financial losses to the Fund and its shareholders. In an extreme case, a shareholder's ability to redeem Fund shares may be affected.
- **Data Risk.** The composition of the Index is dependent on information and data supplied by third parties. When data prove to be incorrect or incomplete, any decisions made in reliance thereon may lead to the inclusion or exclusion of securities from the Index universe that would have been excluded or included had the data been correct and complete. If the composition of the Index reflects such errors, the Fund's portfolio can be expected to also reflect the errors.
- **Depository Receipt Risk.** Depository receipts, including ADRs, involve risks similar to those associated with investments in foreign securities, such as changes in political or economic conditions of other countries and changes in the exchange rates of foreign currencies. Depository receipts listed on U.S. exchanges are issued by banks or trust companies, and entitle the holder to all dividends and capital gains that are paid out on the underlying foreign shares ("Underlying Shares"). When the Fund invests in depository receipts as a substitute for an investment directly in the Underlying Shares, the Fund is exposed to the risk that the depository receipts may not provide a return that corresponds precisely with that of the Underlying Shares. Because the Underlying Shares trade on foreign exchanges that may be closed when the Fund's primary listing exchange is open, the Fund may experience premiums and discounts greater than those of funds without exposure to such Underlying Shares.
- **Equity Market Risk.** The equity securities held in the Fund's portfolio may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific issuers, industries, sectors or companies in which the Fund invests. Common stocks are generally exposed to greater risk than other types of securities, such as preferred stocks and debt obligations, because common stockholders generally have inferior rights to receive payment from issuers.
- **ETF Risks.** The Fund is an ETF, and, as a result of its structure, it is exposed to the following risks:
 - *Authorized Participants, Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that may act as Authorized Participants ("APs"). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
 - *Costs of Buying or Selling Shares.* Due to the costs of buying or selling Shares, including brokerage commissions imposed by brokers and bid/ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.
 - *Shares May Trade at Prices Other Than NAV.* As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Shares will approximate the Fund's NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of Shares or during periods of market volatility. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant. Because securities held by the Fund may trade on foreign exchanges that are closed when the Fund's primary listing exchange is open, the Fund is likely to experience premiums or discounts greater than those of domestic ETFs.

- *Trading.* Although Shares are listed for trading on the NYSE Arca, Inc. (the “Exchange”) and may be traded on U.S. exchanges other than the Exchange, there can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund’s underlying portfolio holdings, which can be significantly less liquid than Shares.
- **Issuer Risk.** Because the Fund may invest in a limited number of issuers, it is subject to the risk that the value of the Fund’s portfolio may decline due to a decline in value of the equity securities of particular issuers. The value of an issuer’s equity securities may decline for reasons directly related to the issuer, such as management performance and reduced demand for the issuer’s goods or services.
- **Market Capitalization Risk.**
 - *Large-Capitalization Investing.* The securities of large-capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion. Large-capitalization companies may also be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.
 - *Mid-Capitalization Investing.* The securities of mid-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large-capitalization companies. The securities of mid-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large capitalization stocks or the stock market as a whole.
 - *Small-Capitalization Investing.* The securities of small-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large- or mid-capitalization companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large- or mid-capitalization stocks or the stock market as a whole. There is typically less publicly available information concerning smaller-capitalization companies than for larger, more established companies.
- **Market Risk.** The trading prices of securities and other instruments fluctuate in response to a variety of factors. These factors include events impacting the entire market or specific market segments, such as political, market and economic developments, as well as events that impact specific issuers. The Fund’s NAV and market price, like security and commodity prices generally, may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time. U.S. and international markets have experienced significant periods of volatility in recent years due to a number of these factors, including the impact of the coronavirus (COVID-19) pandemic and related public health issues, growth concerns in the U.S. and overseas, uncertainties regarding interest rates, trade tensions and the threat of tariffs imposed by the U.S. and other countries. These developments as well as other events could result in further market volatility and negatively affect financial asset prices, the liquidity of certain securities and the normal operations of securities exchanges and other markets. It is unknown how long circumstances related to the pandemic will persist, whether they will reoccur in the future, whether efforts to support the economy and financial markets will be successful, and what additional implications may follow from the pandemic. The impact of these events and other epidemics or pandemics in the future could adversely affect Fund performance.
- **New Fund Risk.** The Fund is a recently organized investment company with no operating history. As a result, prospective investors have no track record or history on which to base their investment decision.
- **Non-Diversification Risk.** Because the Fund is “non-diversified,” it may invest a greater percentage of its assets in the securities of a single issuer or a lesser number of issuers than if it was a diversified fund. As a result, the Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a lesser number of issuers than a fund that invests more widely. This may increase the Fund’s volatility and cause the performance of a relatively small number of issuers to have a greater impact on the Fund’s performance.
- **Passive Investment Risk.** The Fund is not actively managed and its Sub-Adviser would not sell shares of an equity security due to current or projected underperformance of a security industry or sector unless that security is removed from the Index or the selling of shares of that security is otherwise required upon a rebalancing of the Index as addressed in the Index methodology.
- **Portfolio Turnover Risk.** Because the Fund may “turn over” some or all of its portfolio frequently, the Fund may incur high levels of transaction costs from commissions or mark-ups in the bid/offer spread. Higher portfolio turnover (*e.g.*, in excess of 100% per year) may result in the Fund paying higher levels of transaction costs and generating greater tax liabilities for shareholders.
- **Price Volatility Risk.** The value of meme stocks may increase or decrease rapidly or unpredictably, causing the NAV of the Fund to also increase or decrease rapidly or unpredictably.
- **SPAC Investing Risk.** The Fund may invest in equity securities of SPACs, which raise assets to seek potential business combination opportunities. Unless and until a business combination is completed, a SPAC generally invests its assets in U.S. government securities, money market securities, and cash. Because SPACs have no operating history or ongoing business other

than seeking a business combination, the value of their securities is particularly dependent on the ability of the entity's management to identify and complete a profitable business combination. There is no guarantee that the SPACs in which the Fund invests will complete a business combination or that any business combination that is completed will be profitable. The market perception of a SPAC's ability to complete a business combination could materially impact the market value of the SPAC's securities. Public stockholders of SPACs may not be afforded a meaningful opportunity to vote on a proposed initial business combination because certain stockholders, including stockholders affiliated with the management of the SPAC, may have sufficient voting power, and a financial incentive, to approve such a transaction without support from public stockholders. As a result, a SPAC may complete a business combination even though a majority of its public stockholders do not support such a combination. Some SPACs may pursue a business combination only within certain industries or regions, which may increase the volatility of their prices.

- **Tracking Error Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. For example, the Fund incurs operating expenses and portfolio transaction costs not incurred by the Index. In addition, the Fund may not be fully invested in the securities of the Index at all times or may hold securities not included in the Index.

Performance

The Fund is new and therefore does not have a performance history for a full calendar year. In the future, performance information for the Fund will be presented in this section. Updated performance information is available on the Fund's website at www.roundhillinvestments.com.

Portfolio Management

Adviser	Roundhill Financial Inc. (the "Adviser")
Sub-Adviser	Exchange Traded Concepts, LLC
Portfolio Managers	Andrew Serowik, Todd Alberico, and Gabriel Tan, each a portfolio manager for the Sub-Adviser, have been portfolio managers of the Fund since its inception in December 2021

Purchase and Sale of Shares

The Fund issues and redeems Shares at NAV only in large blocks known as "Creation Units," which only APs (typically, broker-dealers) may purchase or redeem. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities (the "Deposit Securities") and/or a designated amount of U.S. cash.

Shares are listed on the Exchange, and individual Shares may only be bought and sold in the secondary market through a broker or dealer at market prices, rather than NAV. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (premium) or less than NAV (discount).

An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (the "bid" price) and the lowest price a seller is willing to accept for Shares (the "ask" price) when buying or selling Shares in the secondary market. The difference in the bid and ask prices is referred to as the "bid-ask spread."

Recent information regarding the Fund's NAV, market price, how often Shares traded on the Exchange at a premium or discount, and bid-ask spreads can be found on the Fund's website at www.roundhillinvestments.com.

Tax Information

Fund distributions are generally taxable as ordinary income, qualified dividend income, or capital gains (or a combination), unless your investment is in an individual retirement account ("IRA") or other tax-advantaged account. Distributions on investments made through tax-deferred arrangements may be taxed later upon withdrawal of assets from those accounts.

Financial Intermediary Compensation

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank) (an "Intermediary"), the Adviser or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange-traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary's website for more information.

ADDITIONAL INFORMATION ABOUT THE INDEX

The Index Provider is an independent third party that is not affiliated with the Fund, the Adviser, the Sub-Adviser, the Fund's distributor, or any of their respective affiliates. The Index Provider provides information to the Fund about its Index constituents and does not provide investment advice with respect to the desirability of investing in, purchasing, or selling securities.

The Index is calculated as a gross total return index.

ADDITIONAL INFORMATION ABOUT THE FUND

Investment Objective

The Fund's investment objective has been adopted as a non-fundamental investment policy and may be changed without shareholder approval upon written notice to shareholders.

Principal Investment Strategies

The Fund has adopted the following policy to comply with Rule 35d-1 under the Investment Company Act of 1940. Such policy has been adopted as a non-fundamental investment policy and may be changed without shareholder approval upon 60 days' written notice to shareholders. Under normal circumstances, the Fund invests at least 80% of its net assets (plus any borrowings for investment purposes) in meme stocks, which may include investments in common stock and depositary receipts.

Principal Investment Risks

An investment in the Fund entails risks. The Fund could lose money, or its performance could trail that of other investment alternatives. The following provides additional information about the Fund's principal risks. It is important that investors closely review and understand these risks before making an investment decision. Just as in the Fund's summary section, the principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with those of other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears.

- **Associated Risks of Meme Stocks.** Meme stocks are stocks whose trading volume increases not necessarily because of a company's performance or fundamentals, but because of social media attention. Social media attention may result from a variety of factors, including the reputation of the issuer, marketing efforts, and the timing of the release of publicly available information, which may be unrelated to the company's performance, financial position, or other business fundamentals. As a result, meme stocks are prone to high volatility, experiencing spikes of rapid growth in short spaces of time, followed by dramatic drops in price and value, which may be a result of panic selling or loss of general interest or popularity. Because meme stocks are heavily dependent on investor sentiment and opinion, they may be overpriced in comparison to the company's fundamentals, resulting in losses to the Fund.
- **Associated Risks of Social Media Analytics.** The Fund's investment strategy relies heavily on social media analytics, which are relatively new and untested. "Social media" is an umbrella term that encompasses various activities that integrate technology, social interaction and content creation. Investing in companies based on social media analytics involves the potential risk of market manipulation because social media posts may be made with an intent to inflate, or otherwise manipulate, the public perception of a company stock or other investment. Although the Index Provider attempts to mitigate the potential risk of such manipulation by employing screens to identify posts which may be computer generated or deceptive and by employing market capitalization and trading volume criteria to remove companies which may be more likely targets for such manipulation, there is no guarantee that such screens will be able to successfully reduce such risk. Furthermore, text and sentiment analysis of social media postings may prove inaccurate in predicting a company's stock performance (*i.e.*, high positive sentiment may not correlate with positive change in the value of a company's stock and low positive or negative sentiment may not correlate with negative change in the value of a company's stock). Additionally, social media companies are susceptible to other events and concerns which may disrupt the ability to extract meaningful data from such sites, including permanent cessation of operations, disruption in service caused by hardware or software failure, interruptions or delays in service by third-party data center hosting facilities and maintenance providers, security breaches involving certain private, sensitive, proprietary and confidential information managed and transmitted by social media companies, privacy concerns and laws, and evolving Internet regulation and other foreign or domestic regulations that may limit or otherwise affect the operations of social media companies.
- **Concentration Risk.** Because the Fund's assets will be concentrated in an industry or group of industries to the extent the Index concentrates in a particular industry or group of industries, the Fund is subject to loss due to adverse occurrences that may affect that industry or group of industries. To the extent the Fund concentrates in the securities of issuers in a particular industry, the Fund may face more risks than if it were diversified more broadly over numerous industries. Such industry-based risks, any of which may adversely affect the Fund may include, but are not limited to, the following: general economic conditions or cyclical market patterns that could negatively affect supply and demand in a particular industry; competition for resources, adverse labor relations, political or world events; obsolescence of technologies; and increased competition or new product introductions that may affect the profitability or viability of companies in an industry. In addition, at times, an industry may be out of favor and underperform other industries or the market as a whole.

- **Cybersecurity Risk.** Cybersecurity incidents may allow an unauthorized party to gain access to Fund assets, customer data (including private shareholder information), or proprietary information, or cause the Fund, the Adviser, the Sub-Adviser and/or other service providers (including custodians, transfer agents and financial intermediaries) to suffer data breaches or data corruption. Additionally, cybersecurity failures or breaches of the electronic systems of the Fund, the Adviser, the Sub-Adviser or the Fund's other service providers, market makers, Authorized Participants or the issuers of securities in which the Fund invests have the ability to cause disruptions and negatively impact the Fund's business operations, potentially resulting in financial losses to the Fund and its shareholders. A cybersecurity incident may disrupt the processing of shareholder transactions, impact the Fund's ability to calculate its net asset value, and prevent shareholders from redeeming their shares.
- **Depository Receipt Risk.** The Fund may hold the securities of non-U.S. companies in the form of depository receipts, including ADRs and Global Depository Receipts ("GDRs"). ADRs are negotiable certificates issued by a U.S. financial institution that represent a specified number of shares in a foreign stock and trade on a U.S. national securities exchange, such as the New York Stock Exchange ("NYSE"). Sponsored ADRs are issued with the support of the issuer of the foreign stock underlying the ADRs and carry all of the rights of common shares, including voting rights. GDRs are similar to ADRs, but may be issued in bearer form and are typically offered for sale globally and held by a foreign branch of an international bank. The underlying issuers of certain depository receipts, particularly unsponsored or unregistered depository receipts, are under no obligation to distribute shareholder communications to the holders of such receipts, or to pass through to them any voting rights with respect to the deposited securities. Issuers of unsponsored depository receipts are not contractually obligated to disclose material information in the U.S. and, therefore, such information may not correlate to the market value of the unsponsored depository receipt. The Underlying Shares in the Fund's portfolio are usually denominated or quoted in currencies other than the U.S. dollar. As a result, changes in foreign currency exchange rates may affect the value of the Fund's portfolio. In addition, because the Underlying Shares trade on foreign exchanges at times when the U.S. markets are not open for trading, the value of the Underlying Shares may change materially at times when the U.S. markets are not open for trading, regardless of whether there is an active U.S. market for Shares.
- **Data Risk.** The composition of the Index is dependent on information and data supplied by third parties. When data prove to be incorrect or incomplete, any decisions made in reliance thereon may lead to the inclusion or exclusion of securities from the Index universe that would have been excluded or included had the data been correct and complete. If the composition of the Index reflects such errors, the Fund's portfolio can be expected to also reflect the errors.
- **Equity Market Risk.** Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. These investor perceptions are based on various and unpredictable factors including: expectations regarding government, economic, monetary and fiscal policies; inflation and interest rates; economic expansion or contraction; and global or regional political, economic and banking crises. If you held common stock, or common stock equivalents, of any given issuer, you would generally be exposed to greater risk than if you held preferred stocks and debt obligations of the issuer because common stockholders, or holders of equivalent interests, generally have inferior rights to receive payments from issuers in comparison with the rights of preferred stockholders, bondholders, and other creditors of such issuers.
- **ETF Risks.** The Fund is an ETF, and, as a result of its structure, it is exposed to the following risks:
 - *Authorized Participants, Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that may act as APs. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
 - *Costs of Buying or Selling Shares.* Investors buying or selling Shares in the secondary market will pay brokerage commissions or other charges imposed by brokers, as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Shares. In addition, secondary market investors will also incur the cost of the difference between the price at which an investor is willing to buy Shares (the "bid" price) and the price at which an investor is willing to sell Shares (the "ask" price). This difference in bid and ask prices is often referred to as the "spread" or "bid/ask spread." The bid/ask spread varies over time for Shares based on trading volume and market liquidity, and is generally lower if Shares have more trading volume and market liquidity and higher if Shares have little trading volume and market liquidity. Further, a relatively small investor base in the Fund, asset swings in the Fund and/or increased market volatility may cause increased bid/ask spreads. Due to the costs of buying or selling Shares, including bid/ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.
 - *Shares May Trade at Prices Other Than NAV.* As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Shares will approximate the Fund's NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to

supply and demand of Shares or during periods of market volatility. This risk is heightened in times of market volatility or periods of steep market declines and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant. The market price of Shares during the trading day, like the price of any exchange-traded security, includes a “bid/ask” spread charged by the exchange specialist, market makers or other participants that trade Shares. In times of severe market disruption, the bid/ask spread can increase significantly. At those times, Shares are most likely to be traded at a discount to NAV, and the discount is likely to be greatest when the price of Shares is falling fastest, which may be the time that you most want to sell your Shares. The Adviser believes that, under normal market conditions, large market price discounts or premiums to NAV will not be sustained because of arbitrage opportunities. Because securities held by the Fund may trade on foreign exchanges that are closed when the Fund’s primary listing exchange is open, the Fund is likely to experience premiums or discounts greater than those of domestic ETFs.

- *Trading.* Although Shares are listed for trading on the Exchange and may be listed or traded on U.S. and non-U.S. stock exchanges other than the Exchange, there can be no assurance that an active trading market for such Shares will develop or be maintained. Trading in Shares may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable. In addition, trading in Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to Exchange “circuit breaker” rules, which temporarily halt trading on the Exchange when a decline in the S&P 500 Index during a single day reaches certain thresholds (e.g., 7%, 13%, and 20%). Additional rules applicable to the Exchange may halt trading in Shares when extraordinary volatility causes sudden, significant swings in the market price of Shares. There can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund’s underlying portfolio holdings, which can be significantly less liquid than Shares.
- **Issuer Risk.** Because the Fund may invest in a limited number of issuers, it is subject to the risk that the value of the Fund’s portfolio may decline due to a decline in value of the equity securities of particular issuers. The value of an issuer’s equity securities may decline for reasons directly related to the issuer, such as management performance and reduced demand for the issuer’s goods or services.
- **Market Capitalization Risk.**
 - *Large-Capitalization Investing.* The securities of large-capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion. Large-capitalization companies may also be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.
 - *Mid-Capitalization Investing.* The securities of mid-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large-capitalization companies. The securities of mid-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large capitalization stocks or the stock market as a whole. Some medium capitalization companies have limited product lines, markets, financial resources, and management personnel and tend to concentrate on fewer geographical markets relative to large-capitalization companies.
 - *Small-Capitalization Investing.* The securities of small-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of larger-capitalization companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole. Some small capitalization companies have limited product lines, markets, and financial and managerial resources and tend to concentrate on fewer geographical markets relative to larger capitalization companies. There is typically less publicly available information concerning smaller-capitalization companies than for larger, more established companies. Small-capitalization companies also may be particularly sensitive to changes in interest rates, government regulation, borrowing costs and earnings.
- **Market Risk.** The trading prices of securities and other instruments fluctuate in response to a variety of factors. These factors include events impacting the entire market or specific market segments, such as political, market and economic developments, as well as events that impact specific issuers. The Fund’s NAV and market price, like security and commodity prices generally, may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time. U.S. and international markets have experienced significant periods of volatility in recent years due to a number of economic, political and global macro factors, including public health issues, growth concerns in the U.S. and overseas, uncertainties regarding interest rates, trade tensions and the threat of tariffs imposed by the U.S. and other countries. These developments as well as other events could result in further market volatility and negatively affect financial asset prices, the liquidity of certain securities and the normal operations of securities exchanges and other markets, which could have an adverse effect on the Fund.

The respiratory illness COVID-19 caused by a novel coronavirus has resulted in a pandemic and major disruption to economies and markets around the world, including the United States. The pandemic has resulted in a wide range of social and economic

disruptions, including closed borders, voluntary or compelled quarantines of large populations, stressed healthcare systems, reduced or prohibited domestic or international travel, supply chain disruptions, and so-called “stay-at-home” orders throughout much of the United States and many other countries. Financial markets have experienced extreme volatility and severe losses, and trading in many instruments has been disrupted. Some sectors of the economy and individual issuers have experienced particularly large losses. Such disruptions may continue for an extended period of time or reoccur in the future to a similar or greater extent. Liquidity for many instruments has been greatly reduced for periods of time. In response to these disruptions, the U.S. government and the Federal Reserve have taken extraordinary actions to support the domestic economy and financial markets, resulting in very low interest rates and in some cases negative yields. It is unknown how long circumstances related to the pandemic will persist, whether they will reoccur in the future, whether efforts to support the economy and financial markets will be successful, and what additional implications may follow from the pandemic. The impact of these events and other epidemics or pandemics in the future could adversely affect Fund performance.

- **New Fund Risk.** The Fund is a recently organized investment company with no operating history. As a result, prospective investors have no track record or history on which to base their investment decision. Moreover, investors will not be able to evaluate the Fund against one or more comparable funds on the basis of relative performance until the Fund has established a track record.
- **Non-Diversification Risk.** Because the Fund is “non-diversified,” it may invest a greater percentage of its assets in the securities of a single issuer or a lesser number of issuers than if it were a diversified fund. As a result, the Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a lesser number of issuers than a fund that invests more widely. This may increase the Fund’s volatility and cause the performance of a relatively small number of issuers to have a greater impact on the Fund’s performance.
- **Passive Investment Risk.** The Fund is not actively managed and its Sub-Adviser would not sell shares of an equity security due to current or projected underperformance of a security industry or sector unless that security is removed from the Index or the selling of shares of that security is otherwise required upon a rebalancing of the Index as addressed in the Index methodology.
- **Portfolio Turnover Risk.** Because the Fund may “turn over” some or all of its portfolio frequently, the Fund may incur high levels of transaction costs from commissions or mark-ups in the bid/offer spread. Higher portfolio turnover (*e.g.*, in excess of 100% per year) may result in the Fund paying higher levels of transaction costs and generating greater tax liabilities for shareholders. Portfolio turnover risk may cause the Fund’s performance to be less than you expect.
- **Price Volatility Risk.** The values of all of the Fund’s investments have the potential to be volatile. Price volatility of an investment refers to the variation of changes in that investment’s value over time. Thus, an investment with higher price volatility is more likely to have greater price swings over shorter time periods than an investment with lower price volatility, and the Fund’s NAV also may increase or decrease rapidly or unpredictably as a result.
- **SPAC Investing Risk.** The Fund may invest in equity securities of SPACs, which raise assets to seek potential business combination opportunities. Unless and until a business combination is completed, a SPAC generally invests its assets in U.S. government securities, money market securities, and cash. Because SPACs have no operating history or ongoing business other than seeking a business combination, the value of their securities is particularly dependent on the ability of the entity’s management to identify and complete a profitable business combination. There is no guarantee that the SPACs in which the Fund invests will complete a business combination or that any business combination that is completed will be profitable. The market perception of a SPAC’s ability to complete a business combination could materially impact the market value of the SPAC’s securities. Public stockholders of SPACs may not be afforded a meaningful opportunity to vote on a proposed initial business combination because certain stockholders, including stockholders affiliated with the management of the SPAC, may have sufficient voting power, and a financial incentive, to approve such a transaction without support from public stockholders. As a result, a SPAC may complete a business combination even though a majority of its public stockholders do not support such a combination. Some SPACs may pursue a business combination only within certain industries or regions, which may increase the volatility of their prices.
- **Tracking Error Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. For example, the Fund incurs operating expenses and portfolio transaction costs not incurred by the Index. In addition, the Fund may not be fully invested in the securities of the Index at all times or may hold securities not included in the Index.

PORTFOLIO HOLDINGS INFORMATION

Information about the Fund’s daily portfolio holdings is available at www.roundhillinvestments.com. A complete description of the Fund’s policies and procedures with respect to the disclosure of the Fund’s portfolio holdings is available in the Fund’s Statement of Additional Information (“SAI”).

MANAGEMENT

Investment Adviser

Roundhill Financial Inc., a Delaware corporation located at 154 West 14th Street, 2nd Floor, New York, New York 10011, serves as the investment adviser for the Fund. The Adviser oversees the day-to-day operations of the Fund, subject to the general supervision and oversight of the Board of Trustees (the “Board”) of Listed Funds Trust (the “Trust”). The Adviser also arranges for sub-advisory, transfer agency, custody, fund administration, distribution and all other services necessary for the Fund to operate. The Adviser is an SEC-registered investment adviser. As of November 30, 2021, the Adviser had approximately \$1.3 billion in assets under management.

The Adviser continuously reviews, supervises, and administers the Fund’s investment program. In particular, the Adviser provides investment and operational oversight of the Sub-Adviser. The Board supervises the Adviser and establishes policies that the Adviser must follow in its day-to-day management activities. For the services it provides to the Fund, the Adviser is entitled to a unified management fee, which is calculated daily and paid monthly, at an annual rate of 0.69% of the Fund’s average daily net assets.

Pursuant to an investment advisory agreement between the Trust, on behalf of the Fund, and the Adviser (the “Advisory Agreement”), the Adviser has agreed to pay all expenses of the Fund except the fee payable to the Adviser under the Advisory Agreement, interest charges on any borrowings, dividends, and other expenses on securities sold short, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, extraordinary expenses, and distribution (12b-1) fees and expenses (if any). The Adviser, in turn, compensates the Sub-Adviser from the management fee it receives.

The basis for the Board’s approval of the Advisory Agreement will be included in the Fund’s first Annual or Semi-Annual Report to Shareholders following commencement of operations.

Sub-Adviser

Exchange Traded Concepts, LLC, an Oklahoma limited liability company located at 10900 Hefner Pointe Drive, Suite 400, Oklahoma City, Oklahoma 73120, is responsible for the day-to-day management of the Fund. An SEC-registered investment adviser formed in 2018, the Sub-Adviser is majority owned by Cottonwood ETF Holdings LLC. As of November 30, 2021, the Sub-Adviser had approximately \$9.4 billion under management.

The Sub-Adviser is responsible for trading portfolio securities for the Fund, including selecting broker-dealers to execute purchase and sale transactions or in connection with any rebalancing or reconstitution of the Fund, subject to the supervision of the Adviser and the Board. For its services, the Sub-Adviser is entitled to a fee by the Adviser, which fee is calculated daily and paid monthly, at an annual rate based on the accumulative average daily net assets of each fund advised (or sponsored) by the Adviser and sub-advised by the Sub-Adviser, and subject to a minimum annual fee as follows:

Minimum Annual Fee	Asset-Based Fee
\$15,000	4 bps (0.04%) on the first \$200 million
	3.5 bps (0.035%) on the next \$800 million
	3 bps (0.03%) on the next \$1 billion
	2.5 bps (0.025%) on the balance over \$2 billion

The basis for the Board’s approval of the Sub-Advisory Agreement will be included in the Fund’s first Annual or Semi-Annual Report to Shareholders following commencement of operations.

Portfolio Managers

Andrew Serowik, Todd Alberico, and Gabriel Tan are the Fund’s Portfolio Managers and are jointly and primarily responsible for the day-to-day management of the Fund’s portfolio.

Mr. Serowik joined the Sub-Adviser from Goldman Sachs. He began his career at Spear, Leeds & Kellogg, continuing with Goldman after its acquisition of SLK. During his career of more than 18 years at the combined companies, he held various roles, including managing the global Quant ETF Strats team and One Delta ETF Strats. He designed and developed systems for portfolio risk calculation, algorithmic ETF trading, and execution monitoring, with experience across all asset classes. He graduated from the University of Michigan with a Bachelor of Business Administration degree in Finance.

Mr. Alberico joined the Sub-Adviser in November 2020, having spent the past 14 years in ETF trading at Goldman Sachs, Cantor Fitzgerald, and, most recently, Virtu Financial. He spent most of that time focused on the Trading and Portfolio Risk Management of ETFs exposed to international and domestic equity. He has worked on several different strategies including lead market-making and electronic trading, to customer facing institutional business developing models for block trading as well as transitional trades. Mr. Alberico graduated from St. John’s University in New York with a Bachelor of Science degree in Finance.

Mr. Tan joined the Sub-Adviser in May 2019 as an Associate Portfolio Manager and was promoted to Portfolio Manager in December 2020. He began his career at UBS and BBR Partners where he worked as a financial planning analyst and a portfolio strategist for over four years. During his time there, he developed comprehensive wealth management solutions focused on portfolio optimization, trust and estate planning, and tax planning. Mr. Tan graduated from the University of North Carolina at Chapel Hill with a Bachelor of Science in Business Administration with a concentration in Investments, a Bachelor of Arts in Economics, and a Minor in Chinese.

The SAI provides additional information about the Portfolio Managers' compensation structure, other accounts managed by the Portfolio Managers, and the Portfolio Managers' ownership of Shares.

Other Service Providers

Foreside Fund Services, LLC (the "Distributor") is the principal underwriter and distributor of the Fund's shares. The Distributor's principal address is Three Canal Plaza, Suite 100, Portland, Maine 04101. The Distributor will not distribute shares in less than whole Creation Units, and it does not maintain a secondary market in the shares. The Distributor is a broker-dealer registered under the Securities Exchange Act of 1934 and a member of the Financial Industry Regulatory Authority, Inc. ("FINRA"). The Distributor has no role in determining the policies of the Fund or the securities that are purchased or sold by the Fund and is not affiliated with the Adviser, Sub-Adviser, or any of their respective affiliates.

U.S. Bancorp Fund Services, LLC, doing business as U.S. Bank Global Fund Services, located at 615 East Michigan Street, Milwaukee, Wisconsin 53202, serves as the administrator, transfer agent and index receipt agent for the Fund.

U.S. Bank National Association, located at 1555 N. Rivercenter Drive, Suite 302, Milwaukee, Wisconsin 53212, serves as the custodian for the Fund.

Morgan, Lewis & Bockius LLP, located at 1111 Pennsylvania Avenue, N.W., Washington, D.C. 20004, serves as legal counsel to the Trust.

Cohen & Company, Ltd., located at 1350 Euclid Avenue, Suite 800, Cleveland, Ohio 44115, serves as the Fund's independent registered public accounting firm. The independent registered public accounting firm is responsible for auditing the annual financial statements of the Fund.

HOW TO BUY AND SELL SHARES

The Fund issues and redeems Shares only in Creation Units at the NAV per share next determined after receipt of an order from an AP. Only APs may acquire Shares directly from the Fund, and only APs may tender their Shares for redemption directly to the Fund, at NAV. APs must be a member or participant of a clearing agency registered with the SEC and must execute a Participant Agreement that has been agreed to by the Distributor, and that has been accepted by the Fund's transfer agent, with respect to purchases and redemptions of Creation Units. Once created, Shares trade in the secondary market in quantities less than a Creation Unit.

Most investors buy and sell Shares in secondary market transactions through brokers. Individual Shares are listed for trading on the secondary market on the Exchange and can be bought and sold throughout the trading day like other publicly traded securities.

When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offer price in the secondary market on each leg of a round trip (purchase and sale) transaction. In addition, because secondary market transactions occur at market prices, you may pay more than NAV when you buy Shares, and receive less than NAV when you sell those Shares.

Book Entry

Shares are held in book-entry form, which means that no stock certificates are issued. The Depository Trust Company ("DTC") or its nominee is the record owner of all outstanding Shares.

Investors owning Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. DTC's participants include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any other securities that you hold in book entry or "street name" through your brokerage account.

Frequent Purchases and Redemptions of Shares

The Fund imposes no restrictions on the frequency of purchases and redemptions of Shares. In determining not to approve a written, established policy, the Board evaluated the risks of market timing activities by Fund shareholders. Purchases and redemptions by APs, who are the only parties that may purchase or redeem Shares directly with the Fund, are an essential part of the ETF process and help keep Share trading prices in line with NAV. As such, the Fund accommodates frequent purchases and redemptions by APs. However, frequent purchases and redemptions for cash may increase tracking error and portfolio transaction costs and may lead to the realization

of capital gains. To minimize these potential consequences of frequent purchases and redemptions, the Fund employs fair value pricing and may impose transaction fees on purchases and redemptions of Creation Units to cover the custodial and other costs incurred by the Fund in effecting trades. In addition, the Fund and the Adviser reserve the right to reject any purchase order at any time.

Determination of Net Asset Value

The Fund's NAV is calculated as of the scheduled close of regular trading on the New York Stock Exchange ("NYSE"), generally 4:00 p.m. Eastern time, each day the NYSE is open for business. The NAV is calculated by dividing the Fund's net assets by its Shares outstanding.

In calculating its NAV, the Fund generally values its assets on the basis of market quotations, last sale prices, or estimates of value furnished by a pricing service or brokers who make markets in such instruments. The values of non-U.S. dollar denominated securities are converted to U.S. dollars using foreign currency exchange rates generally determined as of 4:00 p.m., London time. If such information is not available for a security held by the Fund or is determined to be unreliable, the security will be valued at fair value estimates under guidelines established by the Board (as described below).

Fair Value Pricing

The Board has adopted procedures and methodologies to fair value Fund securities whose market prices are not "readily available" or are deemed to be unreliable. For example, such circumstances may arise when: (i) a security has been de-listed or has had its trading halted or suspended; (ii) a security's primary pricing source is unable or unwilling to provide a price; (iii) a security's primary trading market is closed during regular market hours; or (iv) a security's value is materially affected by events occurring after the close of the security's primary trading market. Generally, when fair valuing a security, the Fund will take into account all reasonably available information that may be relevant to a particular valuation including, but not limited to, fundamental analytical data regarding the issuer, information relating to the issuer's business, recent trades or offers of the security, general and/or specific market conditions and the specific facts giving rise to the need to fair value the security. Fair value determinations are made in good faith and in accordance with the fair value methodologies included in the Board-adopted valuation procedures. Due to the subjective and variable nature of fair value pricing, there can be no assurance that the Adviser or Sub-Adviser will be able to obtain the fair value assigned to the security upon the sale of such security.

Investments by Registered Investment Companies

Section 12(d)(1) of the 1940 Act restricts investments by registered investment companies in the securities of other investment companies. Registered investment companies are permitted to invest in the Fund beyond the limits set forth in section 12(d)(1), subject to certain terms and conditions, including that such investment companies enter into an agreement with the Fund.

DIVIDENDS, DISTRIBUTIONS, AND TAXES

Dividends and Distributions

The Fund intends to pay out dividends, if any, and distribute any net realized capital gains to its shareholders at least annually. The Fund will declare and pay capital gain distributions, if any, in cash. Distributions in cash may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available. Your broker is responsible for distributing the income and capital gain distributions to you.

Taxes

The following discussion is a summary of some important U.S. federal income tax considerations generally applicable to investments in the Fund. Your investment in the Fund may have other tax implications. Please consult your tax adviser about the tax consequences of an investment in Shares, including the possible application of foreign, state, and local tax laws.

The Fund intends to elect and to qualify each year for treatment as a regulated investment company ("RIC"). If it meets certain minimum distribution requirements, a RIC is not subject to tax at the fund level on income and gains from investments that are timely distributed to shareholders. However, the Fund's failure to qualify as a RIC or to meet minimum distribution requirements would result (if certain relief provisions were not available) in fund-level taxation and, consequently, a reduction in income available for distribution to shareholders.

Unless your investment in Shares is made through a tax-exempt entity or tax-advantaged account, such as an IRA plan, you need to be aware of the possible tax consequences when the Fund makes distributions, when you sell your Shares listed on the Exchange, and when you purchase or redeem Creation Units (APs only).

Taxes on Distributions

The Fund intends to distribute, at least annually, substantially all of its net investment income and net capital gains. For federal income tax purposes, distributions of investment income are generally taxable as ordinary income or qualified dividend income. Taxes on distributions of capital gains (if any) are determined by how long the Fund owned the investments that generated them, rather than

how long a shareholder has owned his or her Shares. Sales of assets held by the Fund for more than one year generally result in long-term capital gains and losses, and sales of assets held by the Fund for one year or less generally result in short-term capital gains and losses. Distributions of the Fund's net capital gain (the excess of net long-term capital gains over net short-term capital losses) that are reported by the Fund as capital gain dividends ("Capital Gain Dividends") will be taxable as long-term capital gains, which for non-corporate shareholders are subject to tax at reduced rates of up to 20% (lower rates apply to individuals in lower tax brackets). Distributions of short-term capital gain will generally be taxable as ordinary income. Dividends and distributions are generally taxable to you whether you receive them in cash or reinvest them in additional Shares.

Distributions reported by the Fund as "qualified dividend income" are generally taxed to non-corporate shareholders at rates applicable to long-term capital gains, provided holding period and other requirements are met. "Qualified dividend income" generally is income derived from dividends paid by U.S. corporations or certain foreign corporations that are either incorporated in a U.S. possession or eligible for tax benefits under certain U.S. income tax treaties. In addition, dividends that the Fund receives in respect of stock of certain foreign corporations may be qualified dividend income if that stock is readily tradable on an established U.S. securities market. Corporate shareholders may be entitled to a dividends received deduction for the portion of dividends they receive from the Fund that are attributable to dividends received by the Fund from U.S. corporations, subject to certain limitations.

Shortly after the close of each calendar year, you will be informed of the amount and character of any distributions received from the Fund.

In general, your distributions are subject to federal income tax for the year in which they are paid. Certain distributions paid in January, however, may be treated as paid on December 31 of the prior year. Distributions are generally taxable even if they are paid from income or gains earned by the Fund before your investment (and thus were included in the Shares' NAV when you purchased your Shares).

You may wish to avoid investing in the Fund shortly before a dividend or other distribution, because such a distribution will generally be taxable even though it may economically represent a return of a portion of your investment.

If you are neither a resident nor a citizen of the United States or if you are a foreign entity, distributions (other than Capital Gain Dividends) paid to you by the Fund will generally be subject to a U.S. withholding tax at the rate of 30%, unless a lower treaty rate applies. Gains from the sale or other disposition of your Shares from non-U.S. shareholders generally are not subject to U.S. taxation, unless you are a nonresident alien individual who is physically present in the U.S. for 183 days or more per year. The Fund may, under certain circumstances, report all or a portion of a dividend as an "interest-related dividend" or a "short-term capital gain dividend," which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met. Different tax consequences may result if you are a foreign shareholder engaged in a trade or business within the United States or if a tax treaty applies.

Under legislation generally known as "FATCA" (the Foreign Account Tax Compliance Act), the Fund is required to withhold 30% of certain ordinary dividends it pays to shareholders that are foreign entities and that fail to meet prescribed information reporting or certification requirements.

Under the "backup withholding" provisions of the Internal Revenue Code of 1986, as amended (the "Internal Revenue Code"), the Fund (or a financial intermediary, such as a broker, through which a shareholder owns Shares) generally is required to withhold and remit to the U.S. Treasury a percentage (currently 24%) of the taxable distributions and sale or redemption proceeds paid to any shareholder who fails to properly furnish a correct taxpayer identification number, who has underreported dividend or interest income, or who fails to certify that he, she or it is not subject to such withholding.

Backup withholding is not an additional tax. Any amounts withheld under the backup withholding rules may be allowed as a refund or a credit against a holder's U.S. federal income tax liability, provided the required information is timely furnished to the Internal Revenue Service.

Taxes When Shares Are Sold on the Exchange

Any capital gain or loss realized upon a sale of Shares generally is treated as a long-term capital gain or loss if Shares have been held for more than one year and as a short-term capital gain or loss if Shares have been held for one year or less. However, any capital loss on a sale of Shares held for six months or less is treated as long-term capital loss to the extent of Capital Gain Dividends paid with respect to such Shares. Any loss realized on a sale will be disallowed to the extent Shares of a Fund are acquired, including through reinvestment of dividends, within a 61-day period beginning 30 days before and ending 30 days after the disposition of Shares. The ability to deduct capital losses may be limited.

The cost basis of Shares of a Fund acquired by purchase will generally be based on the amount paid for the Shares and then may be subsequently adjusted for other applicable transactions as required by the Internal Revenue Code. The difference between the selling price and the cost basis of Shares generally determines the amount of the capital gain or loss realized on the sale or exchange of Shares. Contact the broker through whom you purchased your Shares to obtain information with respect to the available cost basis reporting methods and elections for your account.

Taxes on Purchases and Redemptions of Creation Units

An AP having the U.S. dollar as its functional currency for U.S. federal income tax purposes who exchanges securities for Creation Units generally recognizes a gain or a loss. The gain or loss will be equal to the difference between the value of the Creation Units at the time of the exchange and the exchanging AP's aggregate basis in the securities delivered, plus the amount of any cash paid for the Creation Units. An AP who exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between the exchanging AP's basis in the Creation Units and the aggregate U.S. dollar market value of the securities received, plus any cash received for such Creation Units. The Internal Revenue Service may assert, however, that a loss that is realized upon an exchange of securities for Creation Units may not be currently deducted under the rules governing "wash sales" (for an AP who does not mark-to-market its holdings) or on the basis that there has been no significant change in economic position. APs exchanging securities should consult their own tax adviser with respect to whether wash sale rules apply and when a loss might be deductible.

The Fund may include a payment of cash in addition to, or in place of, the delivery of a basket of securities upon the redemption of Creation Units. The Fund may sell portfolio securities to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize investment income and/or capital gains or losses that it might not have recognized if it had completely satisfied the redemption in kind. As a result, the Fund may be less tax efficient if it includes such a cash payment in the proceeds paid upon the redemption of Creation Units.

Net Investment Income Tax

U.S. individuals with income exceeding specified thresholds are subject to a 3.8% tax on all or a portion of their "net investment income," which includes interest, dividends, and certain capital gains (generally including capital gains distributions and capital gains realized on the sale of Shares). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts.

Foreign Investments by the Fund

Interest and other income received by the Fund with respect to foreign securities may give rise to withholding and other taxes imposed by foreign countries. Tax conventions between certain countries and the United States may reduce or eliminate such taxes. If as of the close of a taxable year more than 50% of the value of the Fund's assets consists of certain foreign stock or securities, the Fund will be eligible to elect to "pass through" to investors the amount of foreign income and similar taxes (including withholding taxes) paid by the Fund during that taxable year. This means that investors would be considered to have received as additional income their respective shares of such foreign taxes, but may be entitled to either a corresponding tax deduction in calculating taxable income, or, subject to certain limitations, a credit in calculating federal income tax. If the Fund does not so elect, it will be entitled to claim a deduction for certain foreign taxes incurred by the Fund. The Fund (or a financial intermediary, such as a broker, through which a shareholder owns Shares) will notify you if it makes such an election and provide you with the information necessary to reflect foreign taxes paid on your income tax return.

The foregoing discussion summarizes some of the possible consequences under current federal tax law of an investment in the Fund. It is not a substitute for personal tax advice. You also may be subject to state and local tax on Fund distributions and sales of Shares. Consult your personal tax adviser about the potential tax consequences of an investment in Shares under all applicable tax laws. For more information, please see the section entitled "Federal Income Taxes" in the SAI.

DISTRIBUTION PLAN

The Board has adopted a Distribution and Service Plan (the "Plan") pursuant to Rule 12b-1 under the 1940 Act. In accordance with the Plan, the Fund is authorized to pay an amount up to 0.25% of its average daily net assets each year for certain distribution-related activities and shareholder services.

No Rule 12b-1 fees are currently paid by the Fund, and there are no plans to impose these fees. However, in the event Rule 12b-1 fees are charged in the future, because the fees are paid out of Fund assets, over time these fees will increase the cost of your investment and may cost you more than certain other types of sales charges.

PREMIUM/DISCOUNT INFORMATION

Information regarding how often Shares traded on the Exchange at a price above (*i.e.*, at a premium) or below (*i.e.*, at a discount) the NAV per share is available on the Fund's website at www.roundhillinvestments.com.

ADDITIONAL NOTICES

Shares are not sponsored, endorsed, or promoted by the Exchange. The Exchange is not responsible for, nor has it participated in the determination of, the timing, prices, or quantities of Shares to be issued, nor in the determination or calculation of the equation by which Shares are redeemable. The Exchange has no obligation or liability to owners of Shares in connection with the administration, marketing, or trading of Shares.

Without limiting any of the foregoing, in no event shall the Exchange have any liability for any lost profits or indirect, punitive, special, or consequential damages even if notified of the possibility thereof.

The Adviser, the Sub-Adviser, and the Fund make no representation or warranty, express or implied, to the owners of Shares or any member of the public regarding the advisability of investing in securities generally or in the Fund particularly.
