Investing involves risk, including possible loss of principal. Risks include those related to investments in the highly-competitive sports betting industry, including from illegal or unregulated companies. Expansion of sports betting (both regulated and unregulated), including the award of additional licenses or expansion or relocation of existing sports betting companies, and competition from other leisure and entertainment activities, could impact these companies' finances. Small and mid-capitalization companies may be more volatile and less liquid due to limited resources or product lines and more sensitive to economic factors. Fund investments are concentrated in an industry or group of industries, and the value of Fund shares may rise and fall more than more diversified funds. Investments in foreign securities involve social and political instability, market illiquidity,

exchange-rate fluctuation, high volatility and limited regulation risks. Emerging markets involve different and greater risks, as they are smaller, less liquid and more volatile than more developed countries. Depositary Receipts involve risks similar to those associated with investments in foreign securities, but may not provide a return that corresponds precisely with that of the underlying shares. Please see the prospectus for details of these and other risks.

Shares are bought and sold at market price not net asset value (NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns.
